Dentofruit
MY TOOTHPASTE

Face

Gentle daily toothpaste
Foaming and refreshing
Fluoride free

Certified organic toothpaste specifically designed for children. Its gentle, fluoride-free, foaming formulation removes plaque and helps fight cavities thanks to the cariostatic action of erythritol. Teeth are clean and protected, the mouth healthy and refreshed. Apple-mint scent.

How do I use it?
I apply a pea-sized amount of toothpaste to my toothbrush, brush back and forth for about 2 minutes, then rinse my mouth. Do this after every meal.

How does it work?
- Erytritol is a cariostatic agent that prevents and fights against the formation of caries. It prevents the demineralisation of the enamel, so the acid cannot attack the tooth and form cavities.
- Organic Stevia Rebaudiana extract has antibacterial properties that help prevent cavities.
- Organic aloe vera has anti-inflammatory and anti-plaque properties. Aloe vera helps to eliminate bad bacteria in the teeth and promotes the proper assimilation of nutrients. It strengthens the bones, including the teeth.
- Organic mint leaf water has a refreshing effect when brushing.
- Organic apple water and apple extract remove plaque.
- Glycerine of vegetable origin protects children's sensitive teeth and gums.
- Calcium carbonate is a gentle thickener and abrasive. It allows for gentle cleaning of the teeth.
- Coco-glucoside, a surfactant derived from coconut, enables the formation of foam during brushing.

The result:
My teeth are clean and protected. My mouth is healthy and refreshed.

Proven effectiveness :
- The formula is soft : 100%*.
- The mouth is healthy : 85%*.
- The product removes plaque : 75%*.
- Product foams well : 65%*

**Percentage of satisfaction: use test under oral-dental control on 20 volunteers with sensitive gums, use twice a day for a volunteers with sensitive gums, used twice a day for 2 weeks.*
