ORGANIC PRODUCTS TO GET RID OF LICE AND NITS

A head lice infestation at school and it's quickly a panic! The search for head lice products becomes a real ordeal. Not effective, too aggressive, unpleasant smells... not always easy to find the ideal products to get rid of these little beasts. That's why Toofruit has developed a complete range that is **certified organic, healthy** and has a sweet fruit scent **for optimal control!**

Did you know that ?

Lice do not jump or fly, they are only transmitted by contact (through the hair directly or through personal belongings - cap, hat, scarf, brush, etc.). However, lice are good at swimming and therefore survive a shower or swimming pool.

Lice **multiply** very quickly : the female louse lays about 5 eggs (called nits) per day. These stick to the hair, very close to the scalp. After 7 days, the eggs release a nymph. It grows into an adult louse that can reproduce after 10 days. The adult louse lives for about a month.

The head is an **enabling environment** for lice: it is **warm and humid** and the lice have everything they need **to feed** : blood. Once a louse is removed from the head, it does not survive for long because it is no longer in a pleasant environment and has nothing to feed on. It is therefore not necessary to wash all the child's clothes and sheets at 60°C. Simply put them in a plastic bag for 1 or 2 days and then wash them at normal temperature.

Lice are **not dangerous** for humans. Their presence is not related to the child's hygiene, they are just disturbing because they cause **itching** and are difficult to eliminate.

For this reason, there are **insecticides, chemical** products that kill lice thanks to their toxic effect... powerful products that can become harmful when overexposed. In addition, they are not very good for the environment, and the lice become resistant to them.

Other products on the market are based on **essential oils**. Although natural, these compounds should be handled with care as they can cause allergies or toxicity. They should be avoided by pregnant women and young children.

Oily treatments are natural, safer and suitable for children's scalps.

However, it is necessary to be very meticulous in order to track down all the lice and nits and prevent the survivors from multiplying. To this end, Toofruit has developed a **complete anti-lice range** : Chasse Ô Poux. Thanks to its 4 products, the elimination of these parasites is guaranteed !

My oil mask

My shampoo

My vinegar

My repellent spray

Chasse Ô Poux

MY OIL MASK

Hair

Chokes off lice and nits
No essential oils

Inspired by the natural remedies of our grandmothers

Chasse Ô Poux certified organic oily mask has been specifically designed for children. Inspired by our grandmothers' natural remedies, it acts mechanically to suffocate lice and nits. This 100% vegetable oil-based formula traps lice. This treatment is based on organic coconut oil, organic neem oil and sunflower oil. It works like a trap to engulf the lice by coating them and immobilising them in the grease. Thus, it acts mechanically to suffocate lice and nits..

How do I use it ?

1. With the help of an adult, I apply the mask to the roots of my hair and distribute it well with my fingers to saturate my hair.
2. I leave it on for 2 hours, and ideally overnight, under a bandana or towel.
3. With a fine comb, I remove the unhooked lice and nits. The combination of vegetable oils makes it easier to comb through.
4. I rinse and wash my hair with Chasse Ô Poux Shampoo.

How does it work ?

- Organic coconut oil is a natural and effective ingredient to coat and suffocate lice.
- Organic sunflower oil makes it easier to comb through.
- Organic neem oil has a repulsive effect on lice and nits. It impedes their development.
- Organic carnauba wax, candellila wax, organic sweet almond oil and soybean oil are used to glue lice and nits.

The result :

The lice and nits are trapped in the grease and suffocated. They can be removed with a fine comb. The hair is coated with a greasy film, which is removed with Lice Remover Shampoo + Rinse Vinegar.

Tested and approved by the Toofruit testers' club.

INCI : HELIANTHUS ANNUUS (SUNFLOWER) SEED OIL*, COCOS NUCIFERA (COCONUT) OIL*, COPERNICIA CERIFERA (CARNAUBA) WAX*, VEGETABLE OIL, HYDROGENATED VEGETABLE OIL, PRUNUS AMYGDALUS DULCIS (SWEET ALMOND) OIL*, EUPHORBIA CERIFERA (CANDELLILA) WAX, GLYCINE SOJA (SOYBEAN) OIL, MELIA AZADIRACHTA SEED OIL*, TOCOPHEROL, PARFUM (FRAGRANCE)

Chasse Ô Poux

MY SHAMPOO

Hair

Removes lice and nits
No essential oils

Inspired by the natural remedies of our grandmothers

Chasse Ô Poux Certified Organic Shampoo has been specifically designed for children. Inspired by the natural remedies of our grandmothers, it helps to mechanically remove lice and nits after treatment and cleans gently. This shampoo is based on organic apple vinegar and organic lemon water. It removes lice and nits that have been suffocated by an oil mask. It gently cleans and removes the greasy film left by the oil mask thanks to the gentle surfactants. For a better hunt against lice, it is recommended to use the complete range Chasse Ô Poux.

How do I use it ?

1. After using My Oil Mask, I apply a little shampoo to my hair.
2. I lather my hair on my lengths and roots, paying special attention to the back of my neck and behind my ears.
3. I rinse with warm water
4. With a comb, I remove the remaining parasites.

How does it work ?

- Organic apple vinegar (acetic acid) dissolves the protective coating of the nits and prevents them from sticking to the hair.
- The acidity of organic lemon water makes it easier to clean the oil mask.
- The mild surfactants (coco glucoside, sodium cocoamphodiacetate, caprylyl/capryl glucoside) gently clean the hair and scalp without irritating it.

The result :

The lice smothered by the treatment peel off and fall out thanks to the combination of the shampoo and the circular motions on my scalp. My hair smells like apples.

Tested and approved by the Toofruit testers' club.

INCI : AQUA (WATER), CITRUS LIMON (LEMON) FRUIT WATER*, COCO-GLUCOSIDE, SODIUM COCOAMPHOACETATE, CAPRYLYL/CAPRYL GLUCOSIDE, XANTHAN GUM, ACETUM**, CITRIC ACID, PARFUM (FRAGRANCE), POTASSIUM SORBATE, SODIUM BENZOATE

Chasse Ô Poux

MY RINSE VINEGAR

Degreases hair and removes lice and nits
No essential oils
Inspired by the natural remedies of our grandmothers

Chasse Ô Poux Rinsing Vinegar, certified organic, has been specifically designed for children. Inspired by the natural remedies of our grandmothers, it allows to rinse, to degrease the hair (remains of oily mask) and to gently remove the remaining lice and nits, while making the hair shinier.

This vinegar rinse is based on organic apple vinegar and organic lemon water
For better lice control, we recommend using the complete range Chasse Ô Poux.

How do I use it ?

1. On towel-dried hair, I apply the vinegar directly to the scalp and lengths.
2. Leave in for 2-3 minutes.
3. I comb through the hair to remove the remaining lice and nits.
4. Rinse well with water.

It is recommended to rewash your hair with Lice Remover Shampoo if your hair is still greasy.

How does it work ?

- Organic apple vinegar (acetic acid) dissolves the protective coating of the nits and prevents them from sticking to the hair.
- The organic lemon water degreases (removes oily mask residues), strengthens and makes the hair shinier.

The result :

Remaining lice and nits are loosened and eliminated. In addition, this vinegar rinse naturally balances the pH of the hair and makes the hair shinier.

Tested and approved by the Toofruit testers' club.

Chasse Ô Poux

MY REPELLENT SPRAY

Hair

Keeps lice away
No essential oils

Inspired by the natural remedies of our grandmothers

Chasse Ô Poux Spray certified organic repellent has been specifically designed for children. Inspired by the natural remedies of our grandmothers, it helps to prevent lice infestations. This repellent spray has a preventive action and helps to keep the unwanted away. It can also be used as a preventive measure on clean, dry hair for several days before a treatment protocol. For better head lice control, it is recommended to use the complete range Chasse Ô Poux.

How do I use it ?

1. I gently dry my hair with a towel.
 2. I apply the repellent to the hairline. No need to rinse.
 3. I can also spray repellent on my clothes.
- Use for several days during the lice invasion.

How does it work ?

- Organic apple vinegar (acetic acid) dissolves the protective coating of the nits and prevents them from sticking to the hair.
- Organic lemon water is an excellent natural preventive treatment against lice.
- Vegetable glycerine prevents the scalp and hair from drying out.
- Knotweed is a wild plant, which has a repulsive effect on lice and soothes the itching. More commonly known as a "weed", we are therefore using a natural resource that is most often rejected.

Résultat:

Lice are driven away and won't want to settle on your head. The tangy scent repels lice but not their friends !

Tested and approved by the Toofruit testers' club.
